This book provides a unique historical and qualitative review of ten foreign automakers with plants in developed North America from their early beginnings to their export entry into North America. It seeks to expand the knowledge of American and Canadian policymakers pursuing a new foreign motor vehicle assembly plant or Foreign Direct Investment.

This practical and engaging book provides a coherent approach to global business responsibility and ethics based on the latest research, theory, and practice. The authors incorporate numerous interesting and current real world examples to support the argument that corporations need to - and can - identify and implement processes that foster ethical conduct, ensure basic human rights, protect the natural environment, and enhance social justice wherever businesses operate around the globe. "Global Business Citizenship" combines elements of political theory, stakeholder relationships, business ethics, corporate social performance, accountability and measurement, and organizational change. Its practical approach encompasses "best practices" in stakeholder management, experiments in applying corporate values to local conditions, and social environmental auditing and reporting. Focusing on the strategic alignment and change management process for implementing business citizenship principles and practices, it is an essential supplement for any course concerned with ethics and social responsibility in today's global business climate.
