Zumdahl's 8th

CHEMISTRY brings together the solid pedagogy, easy-to-use media, and interactive exercises that today's instructors need for their general chemistry course. Rather than focusing on rote memorization, **CHEMISTRY** uses a

Access Free Chemistry

thoughtful approach built on problem-solving. For the Ninth Edition, the authors have added a new emphasis on critical systematic problem solving, new critical thinking questions, and new computer-based interactive examples to help students learn how to approach and solve

problems--to learn to
think like

chemists--so that
they can apply the
process of problem
solving to all aspects
of their lives.

Students are
provided with the
tools to become
critical thinkers: to
ask questions, to
apply rules and

develop models, and to evaluate the outcome. In addition, Steven and Susan Zumdahl crafted ChemWork, an online program included in OWL Online Web Learning to support their approach, much as an instructor would offer support during office hours. ChemWork is just one

of many study aids
available with
CHEMISTRY that
supports the
hallmarks of the
textbook--a strong
emphasis on models,
real world
applications, visual
learning, and
independent
problem solving.

Zumdahls use a
meaningful approach
that begins with the
atom and proceeds
through the concept
of molecules,
structure, and
bonding, to more
complex materials

Because this 8th Edition Notes approach differs from what most students have experienced in high school courses, it encourages them to focus on conceptual learning early in the course, rather than relying on memorization and a plug and chug method of problem solving that even the

best students can fall back on when confronted with familiar material. The atoms first organization provides an opportunity for students to use the tools of critical thinkers: to ask questions, to apply rules and models and to evaluate
