Ages and Stages - I CAN is the children's communication ...
The first 3 years of life, when the brain is developing and maturing, is the most intensive period for acquiring speech and language skills. These skills develop best in a world that is rich with sounds, sights, and consistent exposure to the speech and language of others. There appear to be critical periods for speech and language development in infants and young children when the brain is best able to absorb language.

Speech and Language Developmental Milestones | NIDCD
All children are different, so bear in mind that the milestones below are just averages (Harding 2014) – don't worry if it takes your toddler a little longer to master this complicated new skill. How does my baby's speech develop in her first year?
