The Corpus Hermeticum (or Hermetica) is a collection of Egyptian-Greek wisdom texts from the 2nd and 3rd centuries AD. Most of the texts are presented as dialogues in which a teacher, generally identified as Hermes Trismegistus, enlightens a disciple. The texts discuss the divine, the cosmos, mind, and nature. Some touch upon alchemy, astrology, and related concepts. These texts form the basis of Hermeticism.

This is the extended and annotated edition including * an extensive annotation of almost 10.000 words about the history and basics of Gnosticism, written by Wilhelm Bousset The so-called Hermetic writings have been known to Christian writers for many centuries. The early church Fathers (Justin Martyr, Tertullian, Clement of Alexandria) quote them in defense of Christianity. Stobaeus collected fragments of them. The Humanists knew and valued them. They were studied in the sixteenth and seventeenth centuries, and in modern times have again been diligently examined by many scholars. Contents: I. Poemandres, the Shepherd of Men II. To Asclepius III. The Sacred Sermon IV. The Cup or Monad V. Though Unmanifest God Is Most Manifest VI. In God Alone Is Good And Elsewhere Nowhere VII. The Greatest Ill Among Men is Ignorance of God VIII. That No One of Existing Things doth Perish, but Men in Error Speak of Their Changes as Destructions and as Deaths IX. On Thought and Sense X. The Key XI. Mind Unto Hermes XII. About The Common Mind XIII. The Secret Sermon on the Mountain

This complete edition of the Corpus Hermeticum, which introduces in eighteen chapters the religious and philosophical principles of Hermetics, was translated by G. R. S. Mead. Hermetics is a religious, philosophical, and esoteric practice based around the beliefs and writings of the pagan priest Hermes Trismegistus. Influential for its distinct beliefs and characteristics, Hermeticism carried a profound influence over the Renaissance in Europe. Many Christian believers paid it heed, with much art depicting the Hermetic belief system appearing between the 14th and 17th centuries in particular. Notably, Hermetics claims to be a descended version of the prisca theologia - a principle which affirms there is but one, true theology in the world. This essence of the divine is present in all religions, and was according to legend given to mankind in distant antiquity. This belief, discussed by Hermes Trismegistus, has led many scholars of philosophy and religion to examine Hermetics in detail. Hermeticism remains an esoteric interest which attracts a modest amount of attention around the world. As an introduction to the tradition, The Corpus Hermeticum is beyond doubt a good starting point. It introduces and distinguishes the main pillars of Hermeticism in a manner easily comprehended, and is itself a primary source. This translation by G. R. S. Mead originally appeared in 1906, and has been considered authoritative and faithful to the ancient Hermetic texts ever since.

Paperback edition of the recent translation of the esoteric masterpiece, including the first English translation of The Definitions of Hermes Trismegistus to Asclepius • A resource for scholars and religious seekers alike • The Definitions of Hermes Trismegistus to Asclepius provides new insights into the actual workings of the gnostic spiritual path The Corpus Hermeticum, a powerful fusion of Greek and Egyptian thought, is one of the cornerstones of the Western esoteric tradition. A collection of short philosophical treatises, it was written in Greek between the first and third centuries C.E. and translated into Latin during the Renaissance by the great scholar and philosopher Marsilio Ficino. These treatises were central to the spiritual work of hermetic societies in Late Antique Alexandria

(200-700 C.E.) and aimed to awaken gnosis, the direct realization of the unity of the individual and the Supreme. In addition to this new translation of The Corpus Hermeticum, which seeks to reflect the inspirational intent of the original, The Way of Hermes includes the first English translation of the recently rediscovered manuscript of The Definitions of Hermes Trismegistus to Asclepius, a collection of aphorisms used by the hermetic student to strengthen the mind during meditation. With the proper mental orientation, a state of pure perception can be achieved in which the true face of God appears. This document is of enormous value to the contemporary student of gnostic studies for its insights into the actual workings of this spiritual path.

Hermes Trisgemistus (thrice greatest), is the legendary teacher at the core of the Hermeticism, which forms the underlying principles of many religions and esoteric disciplines. This text, written by a renowned gnostic scholar, presents pieces from the tradition, with commentaries and notes.

The Hermetica are Egyptian-Greek wisdom texts from the 2nd and 3rd centuries AD, which are mostly presented as dialogues in which a teacher, generally identified as Hermes Trismegistus ("thrice-greatest Hermes"), enlightens a disciple. The texts form the basis of Hermeticism. They discuss the divine, the cosmos, mind, and nature. Some touch upon alchemy, astrology, and related concepts. With his choice of language, Mead tries to convey both the ambiguity and the elevated, visionary intensity of the material. He correctly understood the Hermetic writings as the distillations of profound spiritual and psychological experiences -- experiences the texts themselves call "Gnosis". These are not philosophical tracts. Their core impetus was communication of a visionary reality. The tradition that produced the Corpus Hermeticum embraced an imaginative, prophetic voice common in Gnostic scriptures; and the insights this "Gnosis" produced are not easily expressed in Greek, or Latin, or any pedestrian dialect of English. But they can be understood, if one has an ear for the core experience. It is the desire to communicate their experience of interior reality that motivated these ancient authors.

Highly acclaimed new translation of the Hermetica, the only English version based on reliable texts.

The Corpus Hermeticum Hermes Trismegistus Translated by G.R.S. Mead The Hermetica are Egyptian-Greek wisdom texts from the 2nd and 3rd centuries AD, which are mostly presented as dialogues in which a teacher, generally identified as Hermes Trismegistus ("thrice-greatest Hermes"), enlightens a disciple. The texts form the basis of Hermeticism. They discuss the divine, the cosmos, mind, and nature. Some touch upon alchemy, astrology, and related concepts. The fifteen tractates of the Corpus Hermeticum, along with the Perfect Sermon or Asclepius, are the foundation documents of the Hermetic tradition. Written by unknown authors in Egypt sometime before the end of the third century C.E., they were part of a once substantial literature attributed to the mythic figure of Hermes Trismegistus, a Hellenistic fusion of the Greek god Hermes and the Egyptian god Thoth. This literature came out of the same religious and philosophical ferment that produced Neoplatonism, Christianity, and the diverse collection of teachings usually lumped together under the label "Gnosticism" a ferment which had its roots in the impact of Platonic thought on the older traditions of the Hellenized East. There are obvious connections and common themes linking each of these traditions, although each had its own answer to the major questions of the time. The treatises we now call the Corpus Hermeticum were collected into a single volume in Byzantine times, and a copy of this volume survived to come into the hands of Lorenzo de Medici's agents in the fifteenth century. Marsilio Ficino, the head of the Florentine Academy, was pulled off the task of translating the dialogues of Plato in order to put the Corpus Hermeticum into Latin first. His translation saw print in 1463, and was reprinted at least twenty-two times over the next century and a half.
