The new edition of Fundamentals of Accounting incorporates a revolutionary instructional model that makes the material more accessible to students. Illustrations appear at the top of each page, with text that refers directly to the illustration directly below. Chapters are broken into easy-to-digest lessons with exercises at the end of each lesson to ensure student comprehension. This new instructional model is simply the best way to teach postsecondary students the real world of accounting! As always, all three accounting cycles are covered when Course 1 and Course 2 texts are combined, giving students a full view of the world of accounting. Course 1 encompasses the first two accounting cycles, while Course 2 includes the third cycle

This introductory accounting text presents a complete accounting cycle of a business organized as a corporation. Topics include analyzing transactions, journalizing, posting, petty cash, financial statements and adjusting and closing entries. Accounting concepts are introduced using a modern business with owners that students can relate to in each cycle.

This is the fullest guide to available games and simulations for use in business and education. There are over 1,400 separate entries -- about half of them new to this edition -- giving each game's name, copyright, manufacturer, price, age and number of players, together with a full description. Twenty four essays evaluate and contrast games for specific settings, making this a consumer report for game users.
