The FinePix 4800 Zoom is probably one of the best of the "pocket size" cameras as of the time of this review. It uses Fujifilm's proven 2.4-megapixel ... You do need to read the user manual to ...

Fujifilm FinePix 4800 Zoom Review
The FinePix F601 Zoom uses Fujifilm's third-generation Super CCD to capture still ... It's a good idea to read the user manual to familiarize yourself with the controls, but after using the camera for ...

Cameras can capture what the eye can't perceive: the presence of infrared light. And shooting infrared (IR) with a digital camera makes it easier than ever to create distinctively dreamlike, high-contrast black-and-white pictures. Using a wealth of stunning images, this thorough resource explores the technical and creative possibilities of this unique and increasingly popular medium. Get tips on focus and exposure; IR filters; and having a camera converted to shoot specifically in infrared. Follow instructions for processing and printing the photos—including toner effects and faux color. One glance through this guide and it's clear why infrared pictures are fun to take and beautiful to look at.

Presenting advances in infrared photography, which has long been an artful alternative to traditional color or black-and-white photography, this guide provides tips for creating vivid infrared prints. Previsualizing the effects of infrared light on a subject, successfully using Adobe Photoshop to heighten the effects of infrared images, and creative toning and framing strategies are discussed. The savings from shooting digitally and using imaging programs during development are also detailed. Before-and-after photographs paired with instructive text provide a visual approach to this ethereal photography form.

Describes the history, landscape, and wildlife of the oldest, largest, and only island national park in the United States.

The Land Speed Record is a fascinating story of human endeavour – of man and machine battling time to be the fastest. Since 1898 many have dreamed of being the fastest on earth, first with electric, then steam, then petrol, moving forward to the jet car, and into the present and future with rocket power. The glory years of the record are studded with iconic names such as Malcolm and Donald Campbell, Henry Segrave, John Cobb, George Eyston, and more recently Craig Breedlove and Richard Noble. The next race is on for 1,000mph with the latest British attempt by Bloodhound SSC. In this colourfully illustrated introduction, using many photographs from the Motoring Picture Library at Beaulieu, Malcolm Campbell's grandson tells of the brave drivers and powerful machines that have propelled themselves into the record books.

This book introduces the subject of fluid dynamics from the first principles.

A UK-focused introduction to the subject of financial management for non-finance students who are looking for an authoritative and user-friendly textbook.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
