Lesson Plan--Elements. Name: 307 Course: Physical Science Grade: 8. Unit: Elements, Compounds, and Mixtures. Big Idea: Matter can be classified into elements, compounds, and Mixtures. Subconcept: Elements are pure substances that have characteristic properties that make. It possible to identify and classify them.

Lesson Plan--Elements

I will begin the lesson, by asking students to share their thoughts about what a mixture is. As students share, I will have them give examples of different mixtures that they are aware of. Having the students share their ideas, activates their background knowledge and allows me to gain an understanding of how much the students know.
