Minimalism is an action- and task-oriented approach to instruction and documentation that emphasizes the importance of realistic activities and experiences for

Read Book

M7310

effective learning and information seeking.

Since 1990, when the approach was defined in John Carroll's *The Nurnberg Funnel*, much work has been done to apply, refine, and broaden the minimalist approach to technical communication. This volume presents fourteen major

Read Book

M7310

Contributions to the current theory and practice of minimalism.

Contributors evaluate the development of minimalism up to now, analyze the acceptance of minimalism by the mainstream technical communications community, report on specific innovations

Read Book

M7310

and investigations, and discuss future challenges and directions. The book also includes an appendix containing a bibliography of published research and development work on minimalism since 1990.

Contributors: Tricia Anson, R. John

Brockmann, John M.
