KwaZulu-Natal is generally hilly or mountainous, especially along its western border. The land rises from the coast to more than 11,000 feet (3,300 metres) along the Drakensberg Escarpment on that border. The slope is not gradual, however, and various rocky outcrops render the terrain into steps of undulating land ascending from an elevation of 500 feet (150 metres) along the coastal plain to areas of 2,000 feet (600 metres) and then 4,000 feet (1,200 metres) in the centre of the province, a ...

GRADE 12 NATIONAL SENIOR CERTIFICATE Basic Education KwaZulu- Natal Department of Basic Education PHYSICAL SCIENCES: CHEMISTRY (P2) PREPARATORY EXAMINATION MEMORANDUM SEPTEMBER 2014 Basic Education This memorandum consists of 10 pages. The marking guidelines as per 2014 Examination Guidelines, pages 34-37 must be applied when marking this Paper.

Apartheid as legislated racial separation substantially changed the South African urban scene. Race group areas' remodelled the cities, while the creation of homelands', mini-states and the pass laws' controlling population migration constrained urbanization itself. In the mid-1980s the old system - having proved economically inefficient and politically divisive - was replaced by a new policy of orderly urbanization'. This sought to accelerate industrialization and cultural change by relaxing the constraints on urbanization imposed by state planning. The result was further political instability and a quarter of the black (or African) population housed in shanty towns. Negotiations between the Nationalist government and the African National Congress are working towards the end of the old apartheid system. Yet the negation of apartheid is only the beginning of the creation of a new society. The vested interests and entrenched ideologies behind the existing pattern of property ownership survive the abolition of apartheid laws. Beyond race, class and ethnicity will continue to divide urban life. If the cities of South Africa are to serve all the people, the accelerating process of urbanization must be brought under control and harnessed to a new purpose. The contributors to this volume draw on a broad range of experience and disciplines to present a variety of perspectives on urban South Africa.

Originally published in 1988, the essays in this book focus primarily on colonial medicine in the British Empire but comparative material on the experience of France and Germany is also included. The authors show how medicine served as an instrument of empire, as well as constituting an imperializing cultural force in itself, reflecting in different contexts, the objectives of European expansion - whether to conquer, to occupy or to settle. With chapters from a distinguished array of social and medical historians, colonial medicine is examined in its topical, regional and professional diversity. Ranging from tropical to temperate regions, from 18th Century colonial America to 20th Century South Africa, this book is an important contribution to our understanding of the influence of European medicine on imperial history.

""Exiled God and exiled peoples"" sets out to explore the perceptions of God within a number of forcibly removed communities in South Africa and Jewish survivors of the Shoah, with the latter being predominantly of German origin. It considers rupture in individual and communal life-stories as a determining factor in the perception of and the relationship with God and follows the path paved by survivors of apartheid and the Shoah by recalling their topo-logy, their stories about place, displacement and terror and the encapsulated relationship with God in their respective exiles. "

Study & Master Physical Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences.
