Surviving a traumatic experience is difficult and takes time to move on from, but this book makes the argument that with proper care and understanding, survivors can grow and reshape their lives in a positive way. For the past twenty years, pioneering psychologist Stephen Joseph has worked with survivors of trauma. His studies have yielded a startling discovery: that a wide range of traumatic events—from illness, divorce, separation, assault, and bereavement to accidents, and terrorism—can act as catalysts for positive change. Boldly challenging the conventional wisdom about trauma and its aftermath, Joseph demonstrates that rather than ruining one's life, a traumatic event can actually improve it. Drawing on the wisdom of ancient philosophers, the insights of evolutionary biologists, and the optimism of positive psychologists, *What Doesn't Kill Us* reveals how all of us can navigate change and adversity—traumatic or otherwise—to find new meaning, purpose, and direction in life.

The story of a modern NFL that can't get out of its own way—and can't stop making money In recent decades, the NFL has simultaneously become an athletic, financial, and cultural powerhouse—and a League that can't seem to go more than a few weeks without a scandal. Whether it's about domestic violence, performance-enhancing drugs, racism, or head trauma, the NFL always seems to be in some kind of trouble. Yet no matter the drama, the TV networks keep showing games, the revenue keeps rising, and the viewers keep tuning in. How can a sports league—or any organization—operate this way? Why do the negative stories keep happening, and why don't they ever seem to affect the bottom line? In this wide-ranging book, Mike Florio takes readers from the boardroom to the locker room, from draft day to the Super Bowl, answering these questions and more, and showing what really goes on in the sport that America can't seem to quit. Known for his constant stream of new information and incisive commentary, Florio delivers again in this book. With new insights and reporting on scandals past and present, this book will be the talk of the League—whether the League likes it or not.

Jerry Fodor argues against the widely held view that mental processes are largely computations, that the architecture of cognition is massively modular, and that the explanation of our innate mental structure is basically Darwinian.

A top leadership consultant says: Stop trying to motivate people! Find a powerful alternative to the carrot and stick in this science-driven guide. It's frustrating for everyone involved and it just doesn't work. You can't motivate people—they are already motivated, but generally in superficial and short-term ways. In this book, Susan Fowler builds upon the latest scientific research on the nature of human motivation to lay out a tested model and course of action that will help leaders guide their people toward the kind of motivation that not only increases productivity and engagement but that gives them a profound sense of purpose and fulfillment. Fowler argues that leaders still depend on traditional carrot-and-stick techniques because they haven't understood their alternatives and don't know what skills are necessary to apply the new science of motivation. Her Optimal Motivation process shows leaders how to move people away from dependence on external rewards and help them discover how their jobs can meet the deeper psychological needs—for autonomy, relatedness, and competence—that science tells us result in meaningful and sustainable motivation. Optimal Motivation has been proven in organizations all over the world—Fowler's clients include Microsoft, CVS, NASA, the Catholic Leadership Institute, H&R Block, Mattel, and dozens more. Throughout this book, she illustrates how each step of the process works using real-life examples—and offers a groundbreaking answer for leaders who want to get motivation right!

INSTANT NEW YORK TIMES BESTSELLER A Good Morning America and Read with Marie Claire Book Club Pick and a People Best Book of Summer Named a Most Anticipated Book of 2021 by Time, The Washington Post, Harper's Bazaar, Entertainment Weekly, Marie Claire, Bustle, BuzzFeed, Parade, Goodreads, Fortune, and BBC ??Named a Best Book of 2021 by Time, The Washington Post, Esquire, Vogue, Entertainment Weekly, The Boston Globe, Harper's Bazaar, and NPR ???Urgent, propulsive, and sharp as a knife, *The Other Black Girl* is an electric debut about the tension that unfurls when two young Black women meet against the starkly white backdrop of New York City book publishing. Twenty-six-year-old editorial assistant Nella Rogers is tired of being the only Black employee at Wagner Books. Fed up with the isolation and microaggressions, she's thrilled when Harlem-born and bred Hazel starts working in the cubicle beside hers. They've only just started comparing natural hair care regimens, though, when a string of uncomfortable events elevates Hazel to Office Darling, and Nella is left in the dust. Then the notes begin to appear on Nella's desk: LEAVE WAGNER. NOW. It's hard to believe Hazel is behind these hostile messages. But as Nella starts to spiral and obsess over the sinister forces at play, she soon realizes that there's a lot more at stake than just her career. A whip-smart and dynamic thriller and sly social commentary that is perfect for anyone who has ever felt manipulated, threatened, or overlooked in the workplace, *The Other Black Girl* will keep you on the edge of your seat until the very last twist.

A 110 page journal notebook with some funny office humor on the cover. Perfect to share to some laughs with coworkers. The smaller 6 x 9 in size is light and portable, and makes the perfect gift! Details 6 x 9 in 110 blank lined pages Matte cover

Polarization is at an all-time high in the United States. But contrary to popular belief, Americans are polarized not so much in their policy preferences as in their feelings toward their political opponents: To an unprecedented degree, Republicans and Democrats simply do not like one another. No surprise that these deeply held negative feelings are central to the recent (also unprecedented) plunge in congressional productivity. The past three Congresses have gotten less done than any since scholars began measuring congressional productivity. In *Why Washington Won't Work*, Marc J. Hetherington and Thomas J. Rudolph argue that a contemporary crisis of trust—people whose party is out of power have almost no trust in a government run by the other side—has deadlocked Congress. On most issues, party leaders can convince their own party to support their positions. In order to pass legislation, however, they must also create consensus by persuading some portion of the opposing party to trust in their vision for the future. Without trust, consensus fails to develop and compromise does not occur. Up until recently, such trust could still usually be found among the opposition, but not anymore. Political trust, the authors show, is far from a stable characteristic. It's actually highly variable and contingent on a variety of factors, including whether one's party is in control, which part of the government one is dealing with, and which policies or events are most salient at the moment. Political trust increases, for example, when the public is concerned with foreign policy—as in times of war—and it decreases in periods of weak economic performance. Hetherington and Rudolph do offer some suggestions about steps politicians and the public might take to increase political trust. Ultimately, however, they conclude that it is unlikely levels of political trust will significantly increase unless foreign concerns come to dominate and the economy is consistently strong.

Writer/director/producer Justine Bateman examines the aggressive ways that society reacts to the aging of women's faces. "Face...is filled with fictional vignettes that examine real-life societal attitudes and internal fears that have caused a negative perspective on women's faces as they age." --The TODAY Show, a Best Book of 2021 "With her new book *Face: One Square Foot of Skin*, Justine Bateman...is trying to push back against the notion that women's faces are broken and need to be fixed..."The book is a meditation on women's faces, and the cultural pressure to be 'ashamed and apologetic that their faces had aged naturally.' --New York Times "[Bateman] studies the topic of women and aging in her new book *Face: One Square Foot of Skin*." --People "There is nothing wrong with your face. At least, that's what Justine Bateman wants you to realize. Her new book, *Face: One Square Foot of Skin*, is a collection of fictional short stories told from the perspectives of women of all ages and professions; with it, she aims to correct the popular idea that you need to stop what you're doing and start staving off any signs of aging in the face." --*W Magazine* "The actor and author of *Face: One Square Foot of Skin* wants to push back against the ubiquity of plastic surgery." --*Vanity Fair* "Justine Bateman extends her creative talents to include fiction in this collection of vignettes that focus on how we've learned to react to women's faces as they age. Based on Bateman's own real-life interviews, the stories dig deep to uncover why we're uncomfortable with faces of a certain age, and argue that confidence--and not cosmetic procedures--are the answer to the problem." --*Town & Country*, one of the Best Books of Spring 2021 "Through a selection of short stories, [Bateman] examines just how complicated it is for women to get older, both in and out of the spotlight." --*Glamour* "Bateman asks, what if we just rejected the idea that older faces need fixing. What if we ignored all the clanging bells that remind women every day on every platform that we are in some kind of endless battle with aging." --*TIME Magazine* "[Bateman] argues that American society has long equated the signs of aging on a woman's face with unattractiveness. But she also asserts that women need not participate in such prejudice by accepting and internalizing it." --AARP "Right on, Justine Bateman. Thanks for helping us embrace our faces just as they are." --Upworthy "It's been a long time since I read something that made me want to stand up and cheer." --*ScaryMommy Face* is a book of fictional vignettes that examines the fear and vestigial evolutionary habits that have caused women and men to cultivate the imagined reality that older women's faces are unattractive, undesirable, and something to be 'fixed.' Based on 'older face' experiences of the author, Justine Bateman, and those of dozens of women and men she interviewed, the book presents the reader with the many root causes for society's often negative attitudes toward women's older faces. In doing so, Bateman rejects those ingrained assumptions about the necessity of fixing older women's faces, suggesting that we move on from judging someone's worth based on the condition of her face. With impassioned prose and a laser-sharp eye, Bateman argues that a woman's confidence should grow as she ages, not be destroyed by society's misled attitude about that one square foot of skin.

"Money doesn't just make the world go round--it spins it upside down, inside out, and out of orbit. Now, thanks to the world's most brilliant cartoonists, it also makes us giggle, chuckle, chortle, and laugh out loud. In *The New Yorker Book of Money Cartoons*, Second Edition, the cartoonist and cartoon editor of *The New Yorker* Robert Mankoff brings together over a hundred classic images that show the influence, power, and occasional insanity of money."--Amazon.com.

Analyzes a series of public domain documents which demonstrate how the government has misled the public, engaging in deception about the objectives and scope of some of its programs and perpetuating wasteful spending and harmful cover-ups.
