Which lens should I buy for my camera? It's such a simple question, but choosing the right lens or lenses is actually one of the most important photographic decisions you can make. Nothing affects the quality of a photo more than the lens. It's no longer just about the megapixels-it's the glass that makes all the difference! Many first-time buyers of DSLRs don't venture past the basic lens included in the box. While some are reluctant to spend more money, others are confused by all the buzzwords or are overwhelmed by all the choices out there. It's really a shame, because interchangeable lenses give you amazing scope for quality photography. Take in vast sweeping scenes with a wide angle lens. Capture faraway birds with a telephoto lens. Examine the tiniest detail of a flower with a macro lens. Record the perfect portrait with a prime lens. Anything is possible when you choose the right lens for the job! This book isn't a simple catalogue of available lenses. New products are coming out all the time, and comparing specific lenses can be difficult. Instead, author N.K. Guy gives you all the information you need to make smart buying decisions. Optical technology is demystified, arcane terminology is decoded, and practical tips are provided. The Lens will help you build the perfect lens collection to suit your needs-now and in the future.

Photographer and writer Shawn M. Tomlinson reconsiders the camera brand that got him started long before digital single-lens reflex cameras existed. In this 12th volume of Shawn M. Tomlinson's Guide to Photography, the author outlines the history of the camera maker, its film and digital cameras, and explains why Pentax still is a viable choice for the serious amateur, enthusiast, semi-pro and professional photographer. From the book: "I was a Pentax Loyalist for years, then a Pentax Apologist, then I rather switched that fight it anymore, then I began to re-appreciate Pentax. ... The point was/is that I write these guide books to help the less-than-wealthy budding photographer get the best equipment possible for the lowest prices possible. ... I write this stuff because I know what it's like to yearn for the newest, shiniest cameras and lenses, yet at the same time know that I cannot possibly afford them. I know there are a lot of other people out there who have the same problem."
