Periodic Trends Quiz Melting Boiling Point Atomic Radius Nuclear Charge Electron Affinity. TERMS IN THIS SET (23) Electron Affinity. The energy change occurring when an anion of the element in the gaseous phase loses an electron. Across a Period: Electron Affinity.

Periodic Trends Quiz: study guides and answers on Quizlet

Periodic Trends Quiz 1. From which of the following is it easiest to remove an electron? a. Mg b. Na c. Al d. S Answer: Na --It's the biggest 2. Which of the following influenced your answer to number one the most? a. nuclear charge (number of protons) b. valence electrons c. inner shell electrons d. shielding effect

Periodic Trends Quiz - howechem.net

Describe the trends in electron configuration in the periodic table by selecting the terms from the drop-down menus. The number of valence electrons 1 from the left to right across a period. The number of valence electrons 2 from the top to the bottom of a group. Electrons are added into the outermost 3 in Groups 1 and 2.

Periodic Trends Flashcards | Quizlet

Unit 8 Quiz--Periodic Trends: Multiple Choice (Choose the best answer.) Which of the following is NOT a trend that varies systematically in the periodic table? electronegativity. symbols of elements. ionization energy. atomic radius. ionic radius. The atomic radius of F, Br, and I are 64, 114, and 138 pm respectively. From this information (and ...

Unit 8 Quiz--Periodic Trends - Thurston High School

answer choices. Atomic radii decrease from left to right across a period and decrease from top to bottom in a group. Atomic radii increase from left to right across a period and increase from top to bottom in a group. Atomic radii decrease from left to right across a period and increase from top to bottom in a group.

Periodic trends worksheet key table periodic trends worksheet key table unit 4 review sheet key 35 chemistry a study of matter worksheet resource plans share this. Support your answer using examples from three groups. H k 2 b 33 3.

Periodic Trends Worksheet 2 Answer Key Chemistry ...

1. Which of the following elements has the most protons? 2. Which of the following elements has the largest atoms? 3. Why does the size of an atom decrease as you move to the right across rows on the periodic table? They have more protons (which results in more pull toward the center). They have more neutrons (which make the atom more compact). They have more electrons (which increase the size of the atom).
