Solids, liquids and gases - The three states of matter ...
Use this handy worksheet with your KS2 Science class to teach them about changes of states of matter, using the example of H2O. H2O can take the form of water, ice and steam without undergoing a chemical reaction, as a result of extreme heat or cold. Your class will use words from the word bank provided to fill in the gaps of the diagram explaining the changing states of water and how they can occur in a cycle.

Changing States of Matter: Ice Water and Steam Worksheet ...
found on Earth can be grouped into one of three states of matter: solid, liquid, or gas. In order to figure out which state of matter an object fits in, we have to examine its properties. The properties we look at are shape, mass, and volume. Mass is the amount of matter an object has, and volume is the amount of space the matter takes up.

And some may want be subsequent to you who have reading hobby.

States Of Matter Answer Sheet - discovervanuatu.com.au
States of Matter: Basics

States of Matter: Basics
We look at five states of matter on the site. Solids, liquids, gases, plasmas, and Bose-Einstein condensates (BEC) are different states of matter that have different physical properties. Solids are often hard, liquids fill containers, and gases surround us in the air. Each of these states is also known as a phase.
