Europe is a strange continent. Strictly speaking it is not a continent at all but a mere peninsula tacked on to Asia, from where many of its first inhabitants undoubtedly came. And yet, despite its huge variety- of features, languages, landscape and peoples- this smallest of continents has achieved a clear cultural identity. It is certainly true that 'Eurospeak' lacks poetry and that the myths of today are mainly nationalist, chauvinistic and of the 'No to Europe-type'. But, says the author, 'My Europe is not the Europe that regulates the curve on bananas, quarrels over subsidies for farmers or fights for places on the Council or Commission. I still believe in dreams, especially the European dream.' The author quotes Vaclav Havel 'Without dreaming of a better Europe, we shall never build a better Europe'. Going back to the origins of the European idea, Dr Schwimmer traces the true content of Robert Schumann's vision and shows how this must still be our inspiration. But the author goes back beyond that and looks at other visions of a Federal Europe. From the Hapsburg Empire to the League of Nations and Woodrow Wilson's celebrated speech in 1918, various concepts are examined carefully. In propounding his dream for the future, the author takes on the Eurosceptics directly and shows how Europe must be the key to its inhabitants tackling the problems of world terrorism, human rights and the internal strife of Russia and the Balkan States.

Rifkin argues that Britain is uniquely positioned to play a bridge role between Europe and America and has the potential to help create a synergy between the two superpowers of the 21st century. But in order to exercise any real influence in world affairs, Britain must choose to be part of a larger political entity. In a globally connected world, no people can exist any longer as an island unto themselves. The only question for Britain is whether it will make its home with America or with Europe.

A master historian takes us deep into the heart of Europe's current political and financial crisis Walter Laqueur was one of the few experts who predicted Europe's current financial and political crisis when he wrote *The Last Days of Europe* six years ago. Now this master historian takes readers inside the European crisis that he foresaw. Ravaged by the world economic meltdown, increasingly dependent on imported oil and gas, and lacking a common foreign policy, Europe is in dire straits. With the authority that comes from thirty years of experience as an expert on political affairs, the author predicts the future prospects of this troubled continent. Europe is the United States' closest ally, and its prosperity is vital to American's success and security. This is a must-read for anyone invested in our country's future.

In this gripping narrative, Carlo Bastasin reconstructs the main political decisions of the euro crisis, unveiling the hidden interests and the secret diplomacy behind the scene. The European dream was both the rejection of war and the creation of a new spirit of peaceful cooperation. Yet confrontation has been the hallmark of the euro crisis, and national opportunistic gimmicks have driven the awkward attempts to solve the crisis itself. Today, Europe is in a crisis of democracy, which Bastasin has dubbed, "the first War of Interdependence of the global age." Praise for the first edition of *Saving Europe* Bastasin does an admirable job in analysing the euro-zone's economic challenges and is a sure-footed guide through the seemingly endless European Union summit meetings that were supposed to resolve them. He also has an eye for the human detail that makes his sad account of institutional muddle surprisingly compelling. — *Financial Times* Bastasin's book is worth reading for its detailed political narrative of the eurozone crisis to date, focusing on the interaction among decision-makers in Europe's capitals. — *Foreign Affairs* A reconstruction that may be considered definitive. Revelations on the European negotiations are written with talent and go hand in hand with no-esoteric economic analysis and with the right amount of realism to reach the political substance. — *Corriere della Sera* Anyone looking for general knowledge and deeper understanding of the crisis, I can recommend a formidable analysis by Carlo Bastasin: *Saving Europe*. The author is a very unusual combination of a qualified economist and driven journalism. — *Svenska Dagbladet*

A quiet revolution has been occurring in post-World War II Europe. A world power has emerged across the Atlantic that is recrafting the rules for how a modern society should provide economic security, environmental sustainability, and global stability. In *Europe's Promise*, Steven Hill explains Europe's bold new vision. For a decade Hill traveled widely to understand this uniquely European way of life. He shatters myths and shows how Europe's leadership manifests in five major areas: economic strength, with Europe now the world's wealthiest trading bloc, nearly as large as the U.S. and China combined; the best health care and other workfare supports for families and individuals; widespread use of renewable energy technologies and conservation; the world's most advanced democracies; and regional networks of trade, foreign aid, and investment that link one-third of the world to the European Union. *Europe's Promise* masterfully conveys how Europe has taken the lead in this make-or-break century challenged by a worldwide economic crisis and global warming.

"The book – using an unconventional approach and a broad historical perspective – analyses the American Empire, the current world order, its defining features, the relations and motivations of the major players and the grand strategies that they outline. In this multi-valued world, what goals and guidelines can safely lead us towards global prosperity? Do we need to set frameworks for our national visions in the 21st century, and if so, what are our main reference points in this volatile, uncertain, complex and ambiguous world? In order to restore the global balance of power, Europe have to give up its imperial ambitions and it has to return to its 16th century roots when European open-mindedness, cultural diversity and spiritual revolutions led to the cradle of future breakthroughs in science, technology and governance. The new global player, China also has an important role in restoring the global balance of power. The USA and China, the two world powers that complements each other in character can bring the new golden age of the global community.."--Abstract.
