Although transportation is clearly an essential part of both supply chain and logistics management, transportation management is a separate discipline and subordinate to both. "Transportation management comprises the processes and systems used to manage the needs and requirements specific to the physical transportation of goods and cargo as part of supply chain or logistics management," Seitz says.

aspects. Dive into planning, execution, and tracking processes and detailed configuration. Get best practices on how to best set up capacity management functionality and learn more about charge calculation and settlement. This hands-on guide is for those new to SAP TM, as well as experienced solution consultants, and includes step-by-step descriptions and screenshots. - A Comprehensive Overview of All of the Processes Enabled by SAP TM - Configuration Best Practices for All Modes of Transport - Instructions for Integrating Transportation Requirements - Tips on Integration with SAP ERP, EWM, GTS, EH&S, EM - Options for Manual, Semi-automated, and Completely Automated Planning

The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as well as ensuring that the organization is able to

realize the benefits expected from the system. Transportation Management with SAP TM 9 is a guide for CIO/CXOs evaluating options for various transportation management solutions available in the market and helps in inappropriate decision making before committing investment. A proven evaluation framework and guidance provided in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM.

Transportation Management with SAP TM 9 also acts as a step by step implementation guide with details of configuration required to set up a TM9 system. This book also covers the upgrade of SAP TM8 to SAP TM9 which will be useful for existing clients who are on TM 8. Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed competency building plan along with skill set requirements to create a competent and trained workforce to manage- transformation. The current book available in

Transportation Management is the most vital link in the supply chain today as it carries the burden of "inventory in motion" in most modern supply chains. This book provides both a conceptual and deeply practical look at transportation, how it has changed since deregulation in 1980 and how modern, global supply chains, have tailored transportation into the critical connection it must be to simultaneously serve billions of consumers while also being highly efficient to meet today's flexibility, speed, and cost constraints.

What can you expect a software developer to do? What type of IT support is used to facilitate the procurement of transportation services? What do your service providers do in order to increase efficiency of the supply chain? How can a tms help in achieving the desired outcomes of logistics and transportation strategies? What is the future of TMS and logistics outsourcing? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-
